

A Randomised Controlled Trial of sildenafil therapy In Dismal Prognosis Early-Onset Intrauterine Growth Restriction

EudraCT: 2013-005398-32 ISRCTN: 39133303

UKCRN:16986

Chief Investigator: Professor Z Alfrevic

Dear all

The STRIDER trial has been open for 4 months now and we are going from strength to strength.

We are very pleased to welcome North Midlands, Royal Victoria Newcastle, Birmingham

Women's, Norfolk and Norwich, St George's and Nottingham University NHS Trust as our most recently opened STRIDER participating centres. This takes our current total to 8 STRIDER sites, with a number of other sites in the final stages of the process in order to open, and we hope to have you all open by the end of March 2015.

Recruitment to STRIDER has been above our expectations with 11 women now enrolled between the 3 sites previously opened. We continue to have a very satisfying level of recruitment with 85% of women approached agreeing to participate in the study. Clearly this is a great start but we still have a long way to go and need your help to make this a success. As an incentive we would like to take the opportunity to remind you that recruitment is competitive across STRIDER sites, and of course so is remuneration.

Also we would like to remind you all to engage as fully as possible with your regional referring centres to increase the chance of getting suitable women at appropriate time points.

Finally we enclose a step by step guide to randomisation, drug allocation and eCRF data entry which may prove helpful.

Thank you

The STRIDER team

STRIDER Team:

Name	Role	Email address	Telephone/Mobile number
Professor Zarko Alfirovic 	Chief Investigator	zarko@liverpool.ac.uk	Tel: 0151 795 9553 Mobile: 07812238459
