

A Randomised Controlled Trial of sildenafil therapy In Dismal Prognosis Early-Onset Intrauterine Growth Restriction

EudraCT: 2013-005398-32 ISRCTN: 39133303

UKCRN:16986

Chief Investigator: Professor Z Alfrevic

Dear all

Wow, what a difference a month makes!

The STRIDER trial has been open for 5 months now and we are going from strength to strength.

We are very pleased to welcome University College London, Guy's and St Thomas', Kings College London, NHS Lothian Edinburgh, Nottingham Women's Hospital Oxford and Leeds as our most recently opened STRIDER participating centres. This takes our current total to 15 STRIDER sites, with a number of other sites in the final stages of the process in order to open, and we hope to have you all open by the end of May 2015.

Recruitment to STRIDER has been above our expectations with 24 women now enrolled between the 7 sites previously opened. This means we have very nearly 1/5th of our recruits already having been only open for 5 months out of a total of 24 months of recruitment. Hopefully, this means we will continue to recruit at this rate and may even complete the study ahead of schedule!

We continue to have a high level of participation with 85% of women approached agreeing to be randomised to STRIDER.

Also we would like to remind you all to engage as fully as possible with your regional referring centres to increase the chance of getting suitable women at appropriate time points.

If you have any queries about anything with STRIDER then please feel free to contact Sarah Quinby (s.quinby@liverpool.ac.uk), Andy Sharp (07551545451) or Zarko Alfrevic (07812238459)

Thank you

The STRIDER team
